Work Experience

GEICO

Business Analyst Intern

May 2019 - Present | Indianapolis, IN

- Perform systems analysis and develop requirements into development-ready user stories to support a new auto sales API.
- Developed an application in C# with a partner intern to fetch, calculate, and display scrum teams' development metrics to managers. Utilized CosmosDB to store this data, and developed a basic Angular UI.

Lionbridge

Maps Analyst

February 2018 - May 2019 | Remote

- Use critical thinking, research, and analysis skills to identify & correct issues with Apple Maps services

American College of Education

Student Operations Intern

September 2017 - January 2018 | Indianapolis, IN

- Utilized customer service skills to fulfill transcript orders and federal loan deferment forms
- Developed remote working and coworking skills
- Worked on special projects as requested, such as creating a visual guide of the new college mobile app
